

KEIM TWINSTAR; The 2in1 façade

The first 2in1 coating for façades. Base coat and top coat go on wet-on-wet in a single pass, with no drying time in between, so the scaffold comes down sooner. Roll or spray it over new render, sound existing paint or insulated façades.

1 pass

Base and top coat wet-on-wet, by roller or airless spray.

No wait

No drying time between coats. Shorter scaffold time.

A2

Non-combustible mineral finish, fire class A2-s1,d0.

Zero

Biocides, solvents or plasticisers. Cradle to Cradle Certified.

	ACRYLIC PAINT	KEIM TWINSTAR
APPLICATION	Primer, wait, then top coat.	Both coats wet-on-wet, one pass. Roll or spray.
BREATHABILITY	Plastic film traps moisture.	Highly vapour-permeable.
ALGAE & MOULD	Relies on biocides that wash out.	Biocide-free protection.
FIRE & ECO	Burns; contains plastics.	Non-combustible, no plastics.

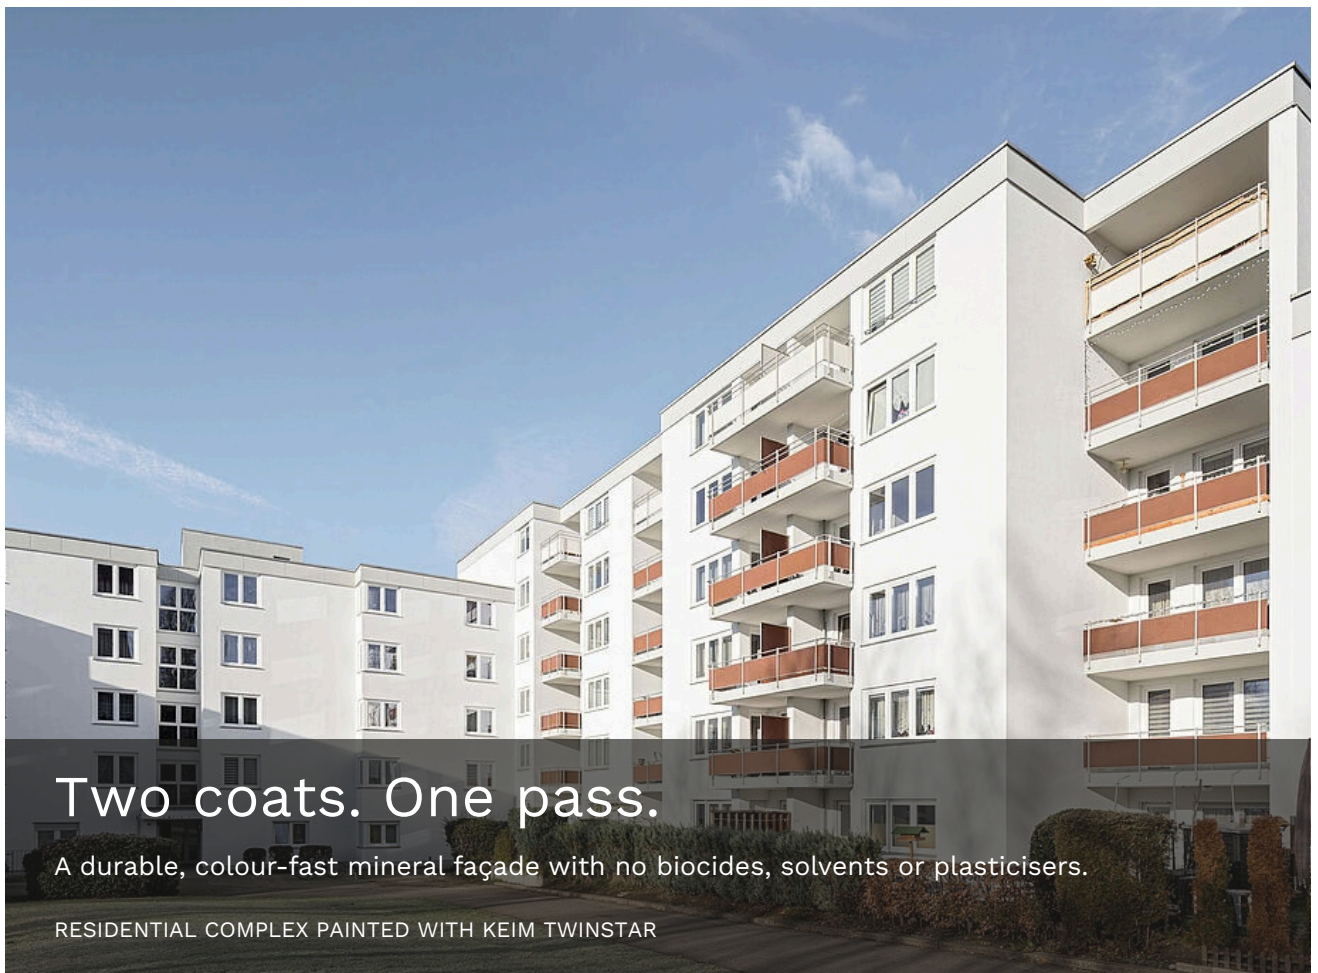

Cradle to Cradle Certified® Version 5: Full Scope Silver, Material Health Gold and Circularity Silver. The global standard for products that are healthy, circular and responsibly made.

EXTERIOR PAINT

Two coats. One pass.

A durable, colour-fast mineral façade with no biocides, solvents or plasticisers.

RESIDENTIAL COMPLEX PAINTED WITH KEIM TWINSTAR

How it goes on

- 1 Roll on the base coat, criss-cross.
- 2 Roll straight into the wet layer, vertically. No waiting.

Roll, brush or airless spray. Goes straight over new render or sound existing paint.

0.45 kg/m²

both coats

air & surface

Same-day finish

Base coat and top coat go on wet-on-wet in one working pass. Fewer days on the scaffold, lower labour and hire costs.
